

# Mythic-Atlas

A real world map, reimagined as if  
ancient mythology were true

HACKATHON PITCH DECK

 ARIEL ZINGER

# Explore a Mythological Version of Earth

A fully interactive, zoomable world map reimagined through the lens of ancient myth and legend.

## Antique World Map

Real, zoomable world map of planet Earth restyled with an ancient hand-drawn-map aesthetic.

## Clickable Lore Points

Click temples, kingdoms, legendary cities, and monsters to read a short lore summary pop-up.

## Here Be Dragons

Sea serpents and monsters scattered across unmapped waters, in the spirit of old "here be dragons" maps.

### Kingdoms Layer

Toggle ancient kingdoms and empires across the globe.

### Temples & Cities

Discover legendary cities and sacred temple sites.

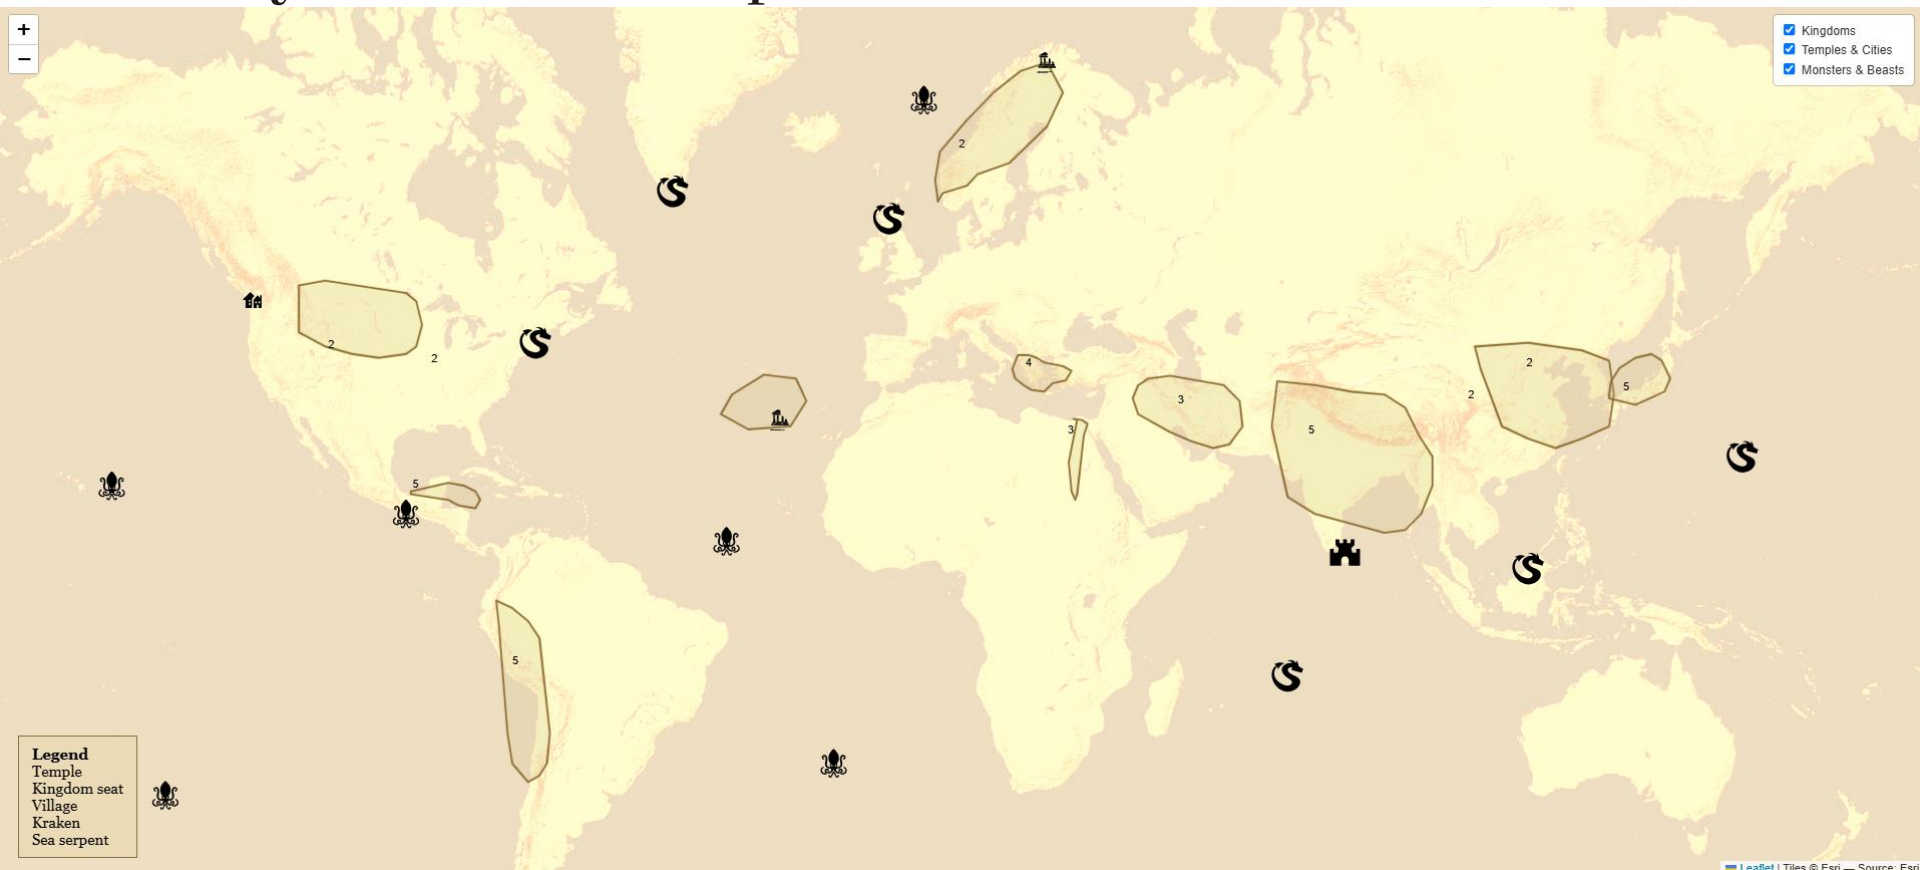

### Monsters & Beasts

Zoom in to reveal creatures lurking in the deep.

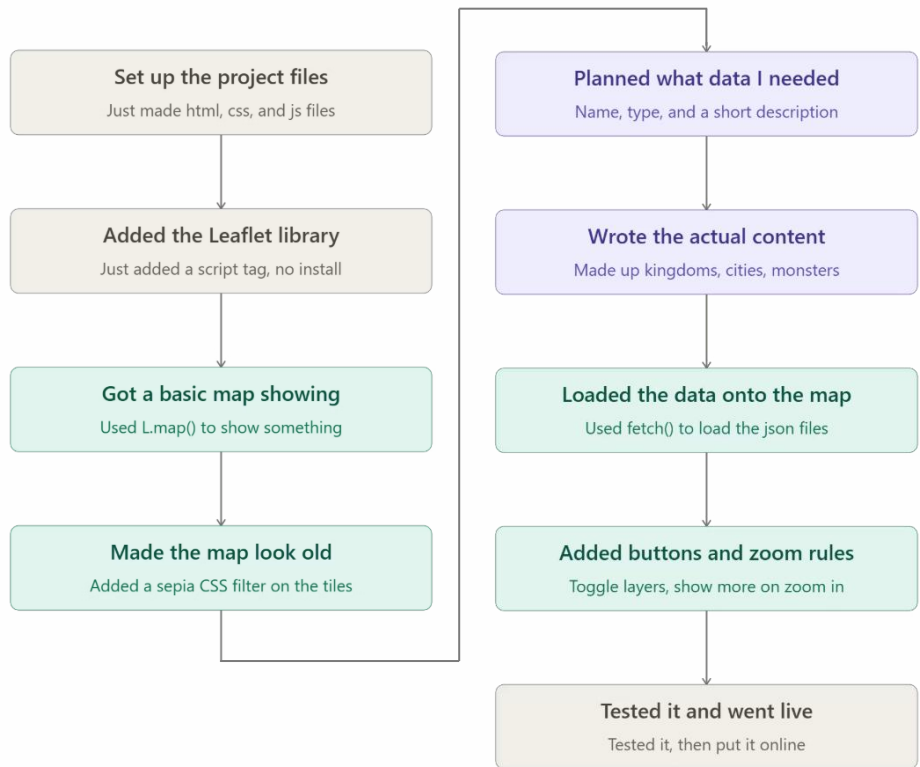

### Zoom Reveal

Zoom in for detail; zoom out for a clustered overview.

# A truly interactive map

# How It's Built

Gray = setup · Teal = building it · Purple = content I wrote

## → Zero-Dependency Frontend

Built with Leaflet.js, JavaScript, HTML and CSS — no backend, no build step required.

## → GeoJSON Data Model

Each kingdom, city, and creature is a GeoJSON feature with a name, category, and short lore summary.

## → Zoom-Based Reveal

Listens for the map's zoomend event and shows or hides markers based on a minimum zoom level stored in each feature.

## → Marker Clustering

Leaflet.markercluster groups nearby points when zoomed out, splitting them apart as the user zooms in.

## → Antique Visual Filter

The old-map look is a CSS filter (sepia, contrast, hue-rotate) applied to a standard OpenStreetMap tile layer — no custom tile rendering needed.

# Challenges, Growth & What I'm Proud Of

## Biggest Challenge

- The ability to have an Independent study and application of out-of-scope material and knowledge, through online sources..
- Debugging, issues not related to the code, code suitability.

## New Skills Gained

- project match for strict timeline
- Independent project design & features
- out-of-scope knowledge gain

## Proudest Moment

Seeing the app connected to online sources, bringing it to life, and explore the different locations and lore.

Questions?

Mythic-Atlas

Explore the world the gods once walked.
